

A NEW DESIGN FOR LENTEN EMBROIDERY AT HOME.

PATTERN

for

LENTEN EMBROIDERY.

Quarter Section Tray Cloth and Doily.

DIRECTIONS.—Secure a piece of fine tarlatan the size of the design, pin it over the pattern, then with a pointed pencil trace the design, which shows through on to the tarlatan. When completed remove the tarlatan and place it on the article to be embroidered, pin into place as before, and then go over the pencil marks again with the pencil, being careful to have a very fine point. Remove the tarlatan and you will find the design beautifully transferred to the fabric.

For linen goods a sheet of carbonized paper can be used to good effect. Place the linen on a smooth, hard surface, put the carbon paper on the linen and then the design over it, and go over the marks with a pencil or a coarse knitting needle. To secure the other quarters of the design, turn over the pattern and trace the design till the four quarters are made, then match them.
